

KFAK

Advanced Bleeding Control Kit

KFAK Advanced Bleeding Control

Item # 56525-BLK (Pictured)

The KFAK Advanced Bleeding Control Kit is designed for immediate use when an emergency lifesaving bleeding out injury may occur. The KFAK comes prepacked with products that have a specific use to assist in a bleeding out incident.

The KFAK design is not just for Law Enforcement or First Responder use. It is designed for everyone, and every type of industry or business.

The Molle bag offers multiple ways to attach to back packs, call out bags, belts, or can be easily placed in bags or in any vehicle or sports vehicles. Its lightweight and size allows it to be easy to store in almost any place.

The products you will find in our KFAK Kits are of the highest quality and are used in hospitals, clinics, first responders and law enforcement officers every day. You never find items in any of our KFAK Brand of kits that have no use or is over stocked to appear that you're getting a great value.

At K Safety we take Stop the Bleed seriously and believe you should have only the best possible kit to assist you in responding, treating, and possibly saving a person's life.

At K Safety we highly suggest and recommend when purchasing any of our brand of KFAK Kits that you attend and become certified in a Stop the Bleed Course, Advanced Bleeding Control Course, or any other certified Bleeding Control course you may have in your area.
